Unreal Engine <

CSS <

Django <

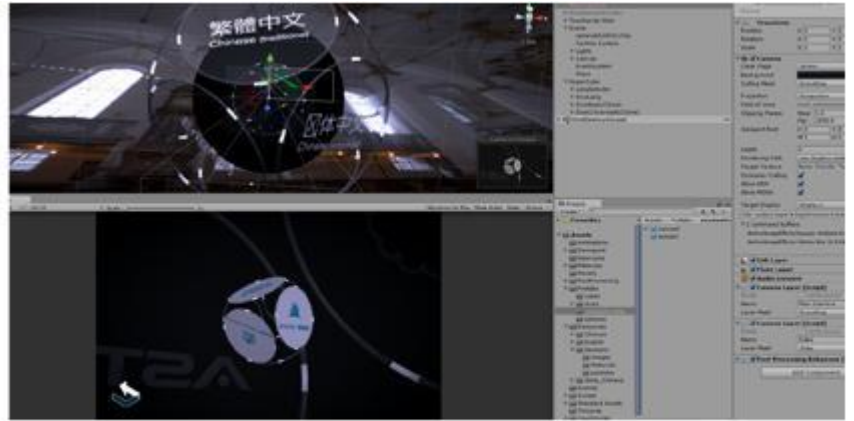

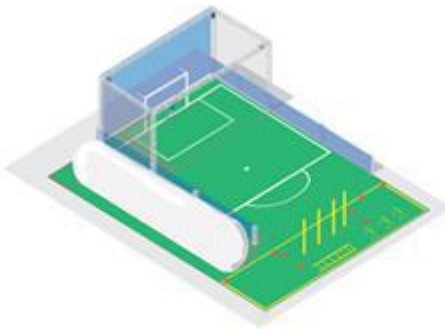

Web HTML5 <

Open Frameworks <

What We Do

Shaman has participated in the development of many Human-Computer Interaction projects around the globe.

1. Empowering Creative Teams

We empower our clients creative team participating from ground zero as a technical advisor, during the development stage, up until delivery and maintenance of the products.

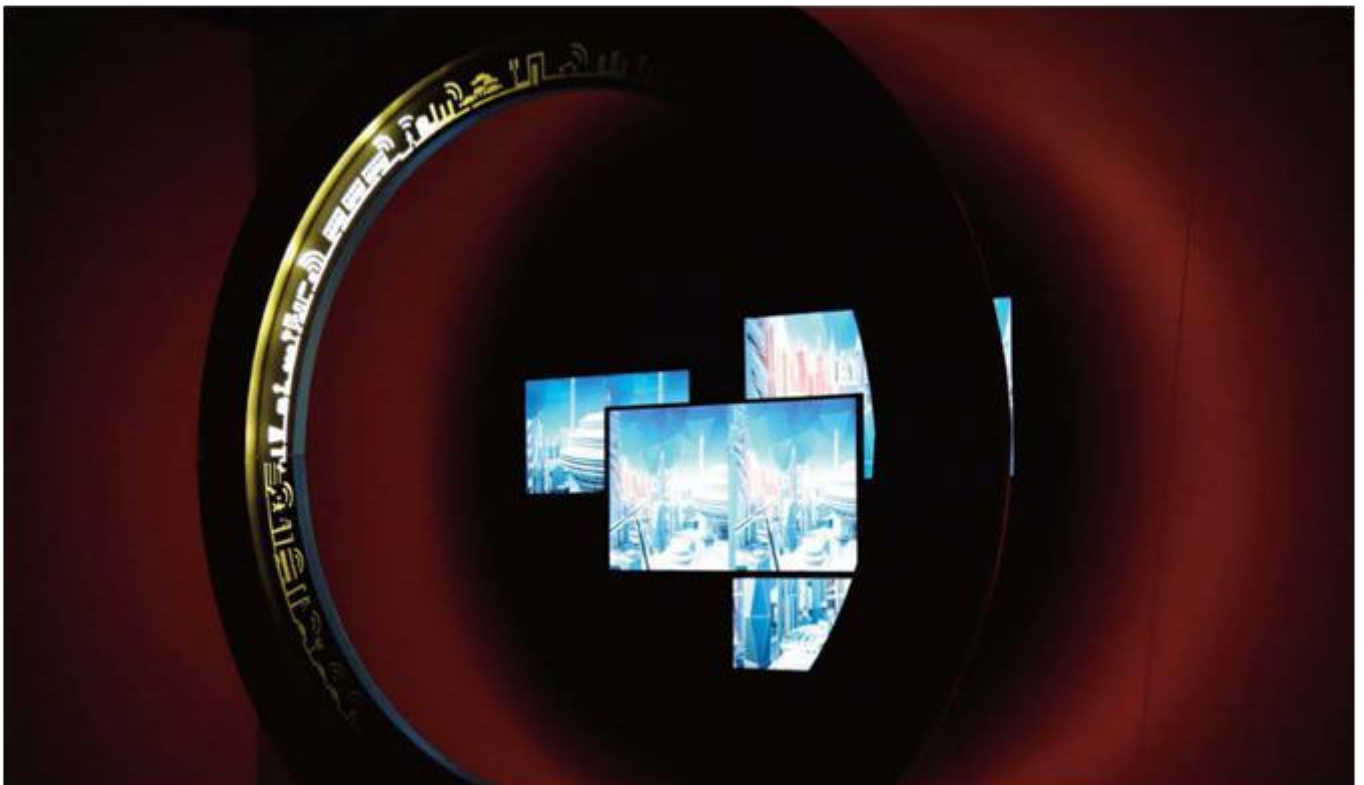

2. Phygital

We love to deliver amazing products that captivates visitors and spectators using a broad set of HCI tools.

3. Museography

We have had the pleasure of working with renowned artists and museums across the globe, assisting them in bringing their ideas to life with the power of a committed and focused team using cutting edge technology.

4. Retailgital

We believe that experiences generate a powerful bond between companies and their customers, and we like to enrich them from our technological point of view.

5. Application Development

Not everything is solved in the physical world. Luckily we also develop interactive web or mobile applications to expand your reach.
